MENTORSHIP PROGRAM AT MAHIGA PRIMARY SCHOOL

We start to learn from the moment we are born. We learn how to attract attention and get our needs met. We learn how to interact with others and how to crawl, walk, and run. A portion of this we learn on our own, and the rest we learn from our parents and siblings. As we grow older, however, the measure of data we can

learn on our own diminishes, and we must rely increasingly on formal education to develop the skills and knowledge we need to be successful in the current world. Education is the key to success, and pursuing education is the best option to achieve one's goals in life.

Education plays a significant role to plan your future as a successful person in life and as a useful citizen in society. I believe no one can neglect the importance of it. Education lessens the challenges of life that one might face. I believe in education. The purpose for that is because it's the key to success and it is a very significant tool that you will require for later life. Education is what keeps people staying out of trouble and making the right decision regardless of the position you're in. Education is something you can't lose so it would be the smartest choice to get as much of it as you can.
