INTRODUCTION

Bridges of Hope and Empowerment mission is in embracing, equipping and empowering the most vulnerable children and youth in the society through education and training.

We continue to restore hope and positive transformation in many lives by initiating programs that lead to a conducive learning environment to the children and self-sustainability to the youth and families thus reducing dependency.

BOHEI has been able to offer school learning materials, learning scholarships to various individuals in primary schools, high schools and the university level. Gardening projects, mentorship and the supply of learning materials are part of our programs. During this Covid-19 pandemic period BOHEI has been at the fore front for helping the affected children by providing protective gear and food donations. We believe that if we unite and work together as a team, the impact will be tremendous. It is the duty of all of us to look out for each other.
